

## Product Profile

<b>Name:</b>	<b>EnviroVac-L</b>
<b>Description:</b>	A biological product designed to achieve environmental control in high traffic areas that tend to remain wet and saturated with urine or other nitrogenous wastes.
<b>Function:</b>	<b>EnviroVac-L</b> contains a unique formulation of naturally occurring bacteria, enzymes and inhibitors that degrade the organic wastes and odours produced in intensive animal housing situations as well as inhibiting the processes that cause odour production. The treated areas produce an environment less conducive to the growth and survival of pathogenic organisms and with improved air quality.
<b>Application:</b>	Dissolve <b>EnviroVac-L</b> in warm (NOT HOT) water at the rate of 2 ounces (50g) of powder per gallon of water and mix thoroughly until completely dissolved. Spray the solution liberally in areas where animals congregate and bedding remains wet. Pay particular attention to areas around feeders and waterers, holding pens and staging areas. Repeat weekly or as required to maintain adequate odor control.
<b>Ingredients:</b>	Bacillus subtilis, Bacillus licheniformis and Bacillus amyloliquefaciens fermentation products; cellulose, xylanase, amylase, protease and lipase; NBTP, dextrose, calcium silicate.
<b>Storage:</b>	This product contains live microorganisms. Store in a cool dry place in original packaging.
<b>Shelf Life:</b>	Use within one year from date of purchase
<b>Packaging:</b>	Available in units of:            1 kg jar
<b>Typical Analysis:</b>	
<b>Microbial:</b>	Bacillus spp @ 4 x 10 <sup>8</sup> cfu/g
<b>Nutritional:</b> (% D.M.)	N/A
<b>Physical Characteristics:</b>	
<b>Color:</b>	Off white
<b>Odor:</b>	Neutral
<b>Texture:</b>	Powder
<b>Manufactured By:</b>	Micron Bio-Systems Inc, 2329 Old Buena Vista Road, Buena Vista, VA 24416 ISO 9001:2008 Registered Company No. FM 514328 AFIA Safe Food/Safe Feed Certified Facility No. 50065-001
